## AMENDMENTS TO THE CLAIMS

The following claim listing will replace or prior listings of claims:

## LIST OF CLAIMS:

- (Currently Amended) A <u>method of improving, enhancing, or preventing decline of composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person <u>comprising administering a composition comprising</u> [[,]] <u>containing</u> arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid.
  </u>
- (Currently Amended) A-composition The method according to claim 1, wherein
  the compound with arachidonic acid as a constituent fatty acid is an arachidonic acid alcohol
  ester or a triglyceride, phospholipid or glycolipid containing arachidonic acid as part or all of the
  constituent fatty acid.
- (Currently Amended) A composition The method according to claim 2, wherein
  the triglyceride containing arachidonic acid as part or all of the constituent fatty acid is a
  triglyceride having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid
  bound at the 2-position.
- (Currently Amended) A-composition <u>The method</u> according to claim 3, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.
- (Currently Amended) A composition The method according to claim 4, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.
- (Currently Amended) A method of improving, enhancing, or preventing decline of composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person comprising administering a composition

DC\634373\1

containing, which contains triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid.

- 7. (Currently Amended) A composition The method according to claim 6, characterized in that the arachidonic acid content of the triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid is at least 10 wt% of the total fatty acid in the triglycerides.
- 8. (Currently Amended) A composition The method according to claim 6, wherein the triglycerides including triglycerides containing composition contains triglycerides containing arachidonic acid as part or all of the constituent fatty acid are extracted from microbes belonging to the genus Mortierella.
- 9. (Currently Amended) A composition The method according to claim 6, wherein the composition containing triglycerides contains including triglycerides containing arachidonic acid as part or all of the constituent fatty acid are triglycerides containing no eicosapentaenoic acid or containing no more than 1% eicosapentaenoic acid.
- 10. (Currently Amended) A method of improving, enhancing, or preventing decline of composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person comprising administering a composition comprising, which contains triglycerides including at least 5 mole percent of triglycerides with medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.
- (Currently Amended) A composition <u>The method</u> according to claim 10, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.
- (Currently Amended) A-composition The method according to claim 11, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.

- 13. (Currently Amended) A composition The method according to claim 1 with effects of decline prevention, improvement or enhancement improving, enhancing, or preventing decline of the normal responses of a healthy person of processing speed or response speed with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli, as a cognitive ability.
- 14. (Currently Amended) A composition The method according to claim 1 with effects of decline prevention, improvement or enhancement improving, enhancing, or preventing decline of the normal response of concentration of a healthy person with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli as a cognitive ability.
- (Currently Amended) A composition The method according to claim 1 with effects of decline prevention, improvement or enhancement of the normal response of awareness level of a healthy person, as a cognitive ability.
- 16. (Currently Amended) A composition The method according to claim 1 with effects of decline prevention, improvement or enhancement improving, enhancing, or preventing decline of the normal response of discriminatory ability of a healthy person with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli, as a cognitive ability.
- (Currently Amended) A composition The method according to claim 1 with an
  effect of shortening P300 latency of the event related potentials of brain (P300), as a response
  index of cognitive ability.
- (Currently Amended) A-eemposition The method according to claim 1 with an
  effect of augmenting the P300 amplitude of the event related potentials of brain (P300), as a
  response index of cognitive ability.

- (Currently Amended) A composition The method according to claim 1, wherein the composition is a food composition or pharmaceutical composition.
- (Original) A food composition containing arachidonic acid and/or a compound
  with arachidonic acid as a constituent fatty acid, in an amount such that the daily ingestion for an
  adult is 0.001-20 g in terms of arachidonic acid.
- 21. (Original) A food composition according to claim 20, wherein the compound with arachidonic acid as a constituent fatty acid is an arachidonic acid alcohol ester or a triglyceride, phospholipid or glycolipid comprising arachidonic acid as part or all of the constituent fatty acid.
- 22. (Original) A food composition according to claim 21, wherein the triglyceride containing arachidonic acid as part or all of the constituent fatty acid is a triglyceride having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.
- 23. (Original) A food composition according to claim 22, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.
- (Original) A food composition according to claim 23, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.
- 25. (Original) A food composition characterized in that the composition contains at least 0.001 wt% of triglycerides having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.
- (Original) A food composition according to claim 25, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.

5

DC\634373\1

- (Original) A food composition according to claim 26, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.
- (Previously Presented) A composition according to claim 20, wherein the food composition is a functional food, nutritional supplement food, special health care food or geriatric food.
- (Currently Amended) A-composition The method according to claim 1, which further comprises docosahexaenoic acid and/or a compound with docosahexaenoic acid as a constituent fatty acid.
- 30. (Currently Amended) -A composition The method according to claim 29, wherein the compound with docosahexaenoic acid as a constituent fatty acid is a docosahexaenoic acid alcohol ester or a triglyceride, phospholipid or glycolipid comprising docosahexaenoic acid as part or all of the constituent fatty acid.
- (Currently Amended) A composition The method according to claim 29, wherein
  the arachidonic acid/docosahexaenoic acid ratio (by weight) in a combination of the arachidonic
  acid and docosahexaenoic acid is in the range of 0.1-15.
- (Currently Amended) A composition The method according to claim 1, wherein
  eicosapentaenoic acid is also present in the composition in an amount not exceeding 1/5 of the
  arachidonic acid in the composition.
- 33. (Currently Amended) A process for production of a food composition with effects of decline prevention, improvement or enhancement for improving, enhancing, or preventing decline of normal responses of cognitive abilities of a healthy person, comprising combining arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid,

either alone or with a food material containing either essentially no or only a trace amount of arachidonic acid.

- 34. (Currently Amended) A method for marketing a composition with effects of decline prevention, improvement or enhancement for improving, enhancing, or preventing decline of normal responses of cognitive abilities of a healthy person containing arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid, the method for marketing a composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person comprising using a packaging container and/or merchandising tool which indicates that the composition and/or components in the composition have effects of decline prevention, improvement or enhancement to improve, enhance, or prevent decline of normal responses of cognitive abilities of a healthy person.
- 35. (Currently Amended) A composition with effects of decline prevention, improvement or enhancement for improving, enhancing, or preventing decline of normal responses of cognitive abilities of a healthy person, comprising composition containing arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid which is marketed using a packaging container and/or merchandising tool for the composition indicating that the composition and/or components in the composition have effects of decline prevention, improvement or enhancement of to improve, enhance, or prevent decline of normal responses of cognitive abilities of a healthy person.
